FACTORY

Factory: We have 3 factories with total area is ~ 10,000m². Factory No. 1 is located on campus of Ninh Hiep - Gia industrial park Lam - Hanoi, located right next to National Highway 1A. With Large-scale factory system methodical investment, equipment and wire advanced sanitary ware production line imported from Germany, Italy, Japan and Taiwan.

Factory includes:

- Department of mold and mechanical design precision gas.
- Copper casting workshop
- Mechanical processing workshop
- Polishing workshop
- Plating workshop
- Assembly & packing workshop

June 2018 Factory in Khu Chau Khe Industrial Park, Tu Son, Bac Ninh officially put into operation with the wiremodern automatic electroplating line top of the world.

Production process:

Established in 2007, Brasler Vietnam., JSC is one of the first and largest high-quality synchronous faucet manufacturing factories in Vietnam. We have a full-process manufacturing system built in accordance with international quality standards. The faucet manufacturing process includes

01

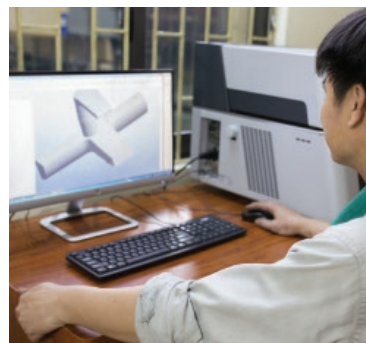

CHOOSING RAW MATERIALS

We always care about the health of consumers. Therefore, we always carefully select raw materials before starting production to ensure that the products we produce are safe for users and environmentally friendly.

02

PRODUCT DESIGN

Our design team includes experts and engineers who are thoroughly trained to design and produce various models and designs, to meet the requirements of customers and water conditions in Vietnam which requires products to ensure good water flow in low pressure water conditions, especially in rural areas.

03

CASTING COPPER

We use the gravity casting method with the Italian IMR synchronous foundry and molding machine system. Copper material sources are carefully selected and supervised in the laboratory with synchronous machinery imported from Germany to ensure the health of consumers.

04

MECHANICAL PROCESSING

To achieve precise control of the product size and surface, our products are mechanically machined on Japanese and Taiwanese single- and multi-axis CNC machines (Brother, Makino, ...)

05

CHROME PLATING AND POWDER COATING

We own a world-leading modern automatic electroplating line, both in increasing the aesthetics of the products and protecting the products from external influences. In addition to Chrome plating technology, which is mostly used in the surface coating of bathroom cleaning products, we are a pioneer in the research and application of new technologies in the metal surface coating, in which the electrostatic painting technology creates products with diversified designs, suitable for extreme conditions such as salty water, limestone water, arsenic water, ... in Vietnam.

06

TECHNICAL TEST

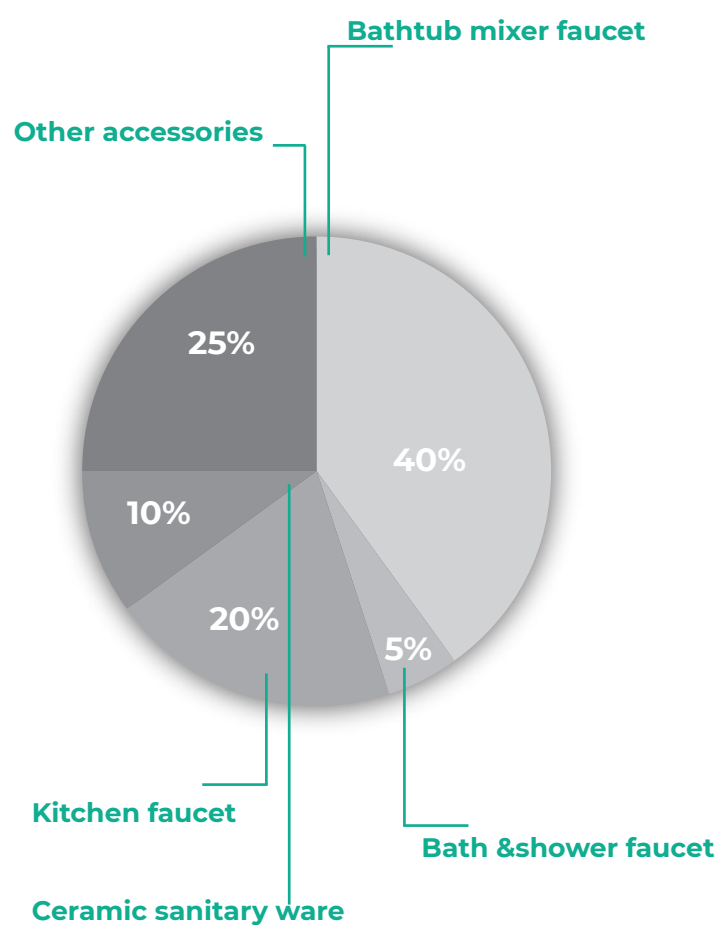

Before being put on the market, our products have to be strictly tested to ensure details, designs and quality so that they are always the best products for consumers.

Quality control:

All finished products are inspected one by one on the finishing by our experienced quality control team. Each items then are packed in seaworthy cartons and well packed to ensure that they are all safe delivered at their final destinations. We also installed the container air-lift to help to arrange the goods faster and better.

Production capacity :

1	<div style="width: 40%;"></div>	400.000 (set/ year)	Bathtub mixer faucet
2	<div style="width: 10%;"></div>	30.000 (set/ year)	Bath & shower faucet
3	<div style="width: 20%;"></div>	200.000 (set/ year)	Kitchen faucet
4	<div style="width: 5%;"></div>	50.000 (set/ year)	Ceramic sanitary ware

Strict production process

We always follow strict rules to ensure that the equipment and accessories manufactured meeting the most rigorous standards

Synchronous chain

We have a Full production line including Casting Line, Machining Line, Polishing Line and Assembling line. We can manufacture products up to 2.000.000 Set per year. .
